

**ENTRIX's Eastern Region is currently seeking to  
fill a Full-time position for a  
SENIOR ECONOMIST**

ENTRIX is currently seeking a Senior Economist to help grow our natural resource economics practice. The location for this position could be in one of the following locations: Tampa, Chicago, Wilmington, Houston or Raleigh.

ENTRIX has one of the largest private groups of agricultural and natural resource economists in the United States. Their expertise is integrated into most of the Company's other practices, particularly water resources, land use management, litigation support, and environmental liability management. Economists are located in offices throughout the country, but work as a national team to meet our clients' needs.

**Responsibilities include, but are not limited to:**

1. Developing and actively marketing to acquire additional work for the company, and maintaining client relationships on existing projects
2. Providing technical support and economic analyses for a wide range of projects
3. Managing small- and large-scale tasks, projects and marketing efforts
4. Providing guidance to other economists related to research methods and analytical techniques
5. Assisting in fostering a strong team environment and developing high-quality products

**Basic Qualifications:**

1. Ph.D. in Resource or Agricultural Economics with ten years of relevant professional experience, including college research and work experience. Candidates with a Master of Science in Resource or Agricultural Economics and sufficient research and work experience will also be considered
2. Strong analytical and quantitative capabilities, including working knowledge of economic theory, mathematics and statistics, and quantitative methods to measure economic benefits and costs
3. Demonstrated project management experience
4. Excellent oral and written communication skills
5. Must be authorized to work in the U.S. without company sponsorship

**Desired Qualifications:**

1. Strong business and client orientation
2. Excellent interpersonal skills, as the candidate will work closely with clients and other employees on a variety of projects
3. Solid time-management and follow-through skills, with the ability to simultaneously work on and manage multiple tasks and projects with tight deadlines
4. Ability to work well independently and with a diverse, multi-disciplinary team in a fast-paced, team-oriented work environment
5. Litigation and expert witness experience
6. Proven track record of business development
7. Coursework in business, finance, econometrics, linear programming, planning, environmental science, and Geographic Information Systems (GIS)
8. Strong proficiency in Microsoft Office Word & Excel, and demonstrated ability to work with statistical software.
