The Economics and Benefits Analysis Specialty Group (EBASG) of the Society for Risk Analysis (SRA) invites you to register for our 2010 continuing education workshops, scheduled for December 5 in Salt Lake City.

**Use of Expert Elicitation to Inform Decisionmaking**

Decision makers frequently rely on data or information that is incomplete or inadequate. Judgment, often from experts, then plays a critical role in the interpretation and characterization of those data. But how experts are selected and how their judgments are elicited matters - strongly influencing the opinions obtained and the analysis on which they rely. This workshop will cover all aspects of expert elicitation, including recruitment, elicitation protocol and techniques, and aggregation methods.

**Introduction to Behavioral Economics**

Behavioral economics is a large and rapidly growing field with numerous implications for risk policy design and analysis. Within the Federal government, behaviorally-informed approaches to regulation are receiving significantly increased attention and emphasis. This workshop provides an introduction to behavioral economics for those who are particularly interested in its application to risk management, introducing related concepts and discussing their application to policy analysis, design, and implementation.

To register, please visit the SRA Annual Meeting website: [http://www.sra.org/events_2010_meeting.php](http://www.sra.org/events_2010_meeting.php). Registration is open to the public. If you pre-register, the cost is $250 for one workshop, discounted to $200 per workshop if combined with any other SRA half-day workshop.
