

PROGRAM AT A GLANCE

2019 SUMMER CONFERENCE

HYATT REGENCY LAKE TAHOE MAY 30-31, 2019

We are honored to publish the JOURNAL of the ASSOCIATION of ENVIRONMENTAL and RESOURCE ECONOMISTS

AERE members receive JAERE as a benefit of membership.

As the official research journal of AERE, the journal's principal mission is to provide a forum for the scholarly exchange of ideas in the intersection of human behavior and the natural environment. Focusing on original, full-length research papers that offer substantial new insights for scholars of environmental and resource economics, *JAERE* presents a range of articles that are relevant for public policy, using approaches that are theoretical, empirical, or both. Learn more at journals.uchicago.edu/jaere.

JAERE's first Impact Factor will be released in June 2020.

The journal was accepted in the Economics and Environmental Studies Social Sciences Citation Index in 2019.

Marine Resource Economics

MARINE RESOURCE ECONOMICS SAVE 20% WITH CODE "AER20" | RATES START AT \$50.00 \$40.00 | JOURNALS.UCHICAGO.EDU/MRE

Marine Resource Economics publishes creative and scholarly economic analyses of a range of issues related to natural resource use in the global marine environment. The scope of the journal includes conceptual and empirical investigations aimed at addressing real-world ocean and coastal policy problems.

2019 Summer Conference | May 30-31, 2019 | Pre-Conference Workshop: May 29, 2019 Hyatt Regency Lake Tahoe | Incline Village, NV

General Sessions

General sessions are 90 minutes in length, and typically include four papers. Each presenter is given 15-18 minutes, followed by 2-4 minutes of audience Q&A. No General Session presentation (including questions) may exceed 22 minutes. This is strictly enforced by the session chair. Sessions with fewer than four papers follow the same format, with a maximum of 22 minutes per paper.

These guidelines allow attendees to move between sessions after one paper is completed and can see another paper in the same time frame. To further enable movement between sessions, papers are presented in the order they appear in the program.

Sponsored Sessions

Sponsored sessions are 90 minutes in length, and typically include three papers. Each presenter is given 15 minutes, followed by 8 minutes for a discussant, and 7 minutes for audience Q&A. No Sponsored Session presentation (including discussant and questions) can exceed 30 minutes. This is strictly enforced by the session chair.

Poster Sessions

Poster sessions will display research projects. Authors are encouraged to be near their posters during the scheduled poster sessions and chat with interested folks. A great way to meet new people!

Introduction to the Issue: The 2018 Farm Bill and Brexit

Richard J. Sexton and Daniel A. Sumner

We're very pleased to present ARE Update readers with an expanded issue focused on two timely policy topics: The passage of the 2018 Farm Bill and the impending "Brexit" of the United Kingdom from the European Union.

The Agriculture Improvement Act of 2018 is the official title of the newest Farm Bill. It is the most recent of a line of periodic laws that authorize a set of loosely related government programs that are mostly administered by the U.S. Department of Agriculture (USDA). The nickname "Farm Bill" emerged when these laws dealt mostly with farm issues, something that has not been true for decades. Today food and nutrition subsidies, programs far removed from the farm, comprise the great bulk of the authorized spending.

Although agricultural programs have existed in the U.S. since the earliest days of the republic, the modern era of farm commodity subsidies, price regulations, crop insurance, storage programs, and soil conservation and environmental programs began in 1933 with New Deal legislation. Every few years for the next nine decades, these

programs have been renewed and modified. As is also true with the 2018 Farm Bill, much of the content of these farm bills took the form of amending the previous law for a fixed number of years. For example, many of the 2014 authorizations expired in 2018, so some legislation was needed or else those programs would have simply ended or reverted to so-called "permanent legislation" that is more than half a century out of date. Much of the current Farm Bill authorizes programs and annual expenditures on them only for the next

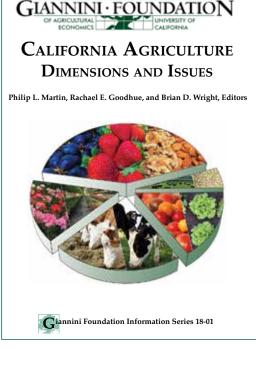

The 2018 Farm Bill has 12 Titles. Our first article by Lee and Summer focuses mainly on Title I on commodities. They also touch on Titles X (Horticulture) and XI (Crop Insurance). The authors highlight changes in 2018 that provide added subsidies to dairy (the largest farm revenue generator in California) and cotton.

five years, so the cycle continues.

The second article by Bruno and Zilberman addresses conservation, Title II. They report that total funding for conservation programs is little changed in the new Farm Bill, but funds have been reallocated across key programs. The authors break down what it all means for California.

Ambrozek and Beatty address Title IV on Nutrition. The major change in these programs involves work requirements for able-bodied adults without dependents (ABAWD) in the Supplemental Nutrition Assistance Program (SNAP). Ambrozek and Beatty also draw attention to administrative rules proposed by the USDA subsequent to passage of the 2018 Farm Bill that will tighten requirements for ABAWD.

Brexit is scheduled to occur on March 29 of this year. UC Davis professor Colin Carter is on leave this year in Ireland and, with co-author Doris Läpple, provides *Update* readers with key insights into the disruptions to international agricultural trade that loom on the eve of Brexit. Carter and Läpple forecast major disruptions in Irish trade of beef and dairy products to Britain, and explain what it is likely to mean for other major agricultural exporters, including the United States.
